Early Printed Books

The Pembroke Incunabula.

To my Customers:

The Collection of Early Printed Books now on Exhibition at my New Store and offices at 547 Fifth Avenue has been selected principally by me from the Magnificent Library of the Earl of Pembroke, a portion of which, comprising the Illuminated Manuscripts, Block Books and Incunabula, was recently sold at Auction in London, at which Sale I was the Largest Purchaser.

The Origin of this Historic Library remains unknown. The Great Bibliographer Thomas Frognal Dibdin considered it to be one of the oldest private Collections in Existence; and from the time of the Third and Fourth Earls of Pembroke, **"the Incomparable Pair of Brethren"** to whom the First Folio Shakespeare was dedicated, the Library was continually being enriched by Additions supplied by the descendants of a Family, always renowned for their Cultivation of Literature and the Fine Arts.

Among the Books themselves, that may be briefly mentioned here, is a Copy of the Superlatively Rare Dutch Edition of the **"Speculum Humanae Salvationis"** known in Dutch as **"Dat Speghel der Menscheliker Behoudenisse."** Besides this, the Pembroke Copy, there are two copies, **both imperfect** in the City Library of Haarlem, in which City this wonderful Specimen of Xylography is said to have been produced by Lawrenz Janson Koster. There was also a Copy, likewise imperfect in the Town Library of Lille which has probably been destroyed by Fire in the Present War. No Copy, perfect or imperfect, is to be found in the Great British Museum Collections, the Bodleian Library at Oxford or in the National Library at Paris.

Another Monument of the Greatest Typographical Importance is the "Catholicon" of Joannes Balbus, printed by Gutenberg, the Inventor of Printing, and of special interest as being the fourth Book printed with a date, 1460, and of the Greatest Literary Value and Interest as being the First Lexicon or Dictionary ever published. There is also a Beautiful Copy of the **First Edition** of the **First Greek Lexicon** printed in Milan in 1499, compiled by Suidas.

The Collection includes 5 Books from the Press of William Caxton the First English Printer, amongst them being the First Work ever printed in the English Tongue,

known as the **"Recuyell of the Histories of Troye."** This was printed by Caxton at Bruges. Another Magnificent Volume is the **"Game and Playe of the Chesse"** being the Second Book printed by Caxton in England and the Second English Book to appear with Illustrations. The other three Caxtons are Higden's Polychronicon, 1482; Mirk's Festivall, 1490; and Cicero on Old Age, 1481.

This assembling of as many as Five Caxtons in any one Catalogue is a Matter of Exceptional Literary Importance and has never before happened in America.

Of Equal Importance is the Famous **"Book of Saint Albans"** printed by the School Master Printer of Saint Albans in 1486. This is notable as being not alone one of the very Rarest Books in the English Tongue, but also at the same time, as being the Earliest of the innumerable English Books on Sport, the First English Armorial, and also the first Book to contain English Popular Rhymes.

Two Exceedingly Curious Relics of Religious History in the shape of Papal Indulgences for the Remission of Sin are to be found in the Collection. These Indulgences were offered at Public Sale by the Priests during the Thirteenth, Fourteenth and Fifteenth Centuries, and empowered the Confessor, upon receipt of a prescribed fee, to grant Full and Absolute Pardon in Life and Death, for any Sins however enormous, committed by the penitent purchaser. One of these is a particularly interesting specimen of Block Printing dated 1482 and supposed to have been issued in Munich, where Letter-Press Printing was only introduced at the very end of the Century.

Wonderfully fine specimens of the Early Wood-Engraver's Art are to be found in many of the Volumes Exhibited and the Collection comprises many Splendid Incunabula from the First Presses of Mentz, Strassburg, Cologne, Nuremberg, Ulm, Basel, Rome, Florence, Venice, Milan, Bologna, Ferrara, Verona, Paris, Lyons, Louvain, Bruges, Haarlem, Westminster and London.

As was the Custom of the Period the Margins, First Pages and Initial Spaces of the Books have been beautifully Illuminated and Artistically Painted and Decorated by the foremost Artists then practising in the different Countries mentioned.

Of Rare and Early French and Italian Books the Number is large and includes many which are very seldom seen in Bookseller's Catalogues. Amongst them being the only known vellum printed Copy of Jehan Bouchet's **"Lamoureux transy sans Espoir"** published by Anthoine Verard of Paris and very richly decorated with 20 superb Illuminated Miniatures.

Magnificent Specimens of the Works of the Fathers of the Church and other Early Christian Writers are nobly represented; such as the First Edition of the Works of Saint Ambrose printed at Basel in 1492; the Writings of Alexander de Ales, an English Franciscan Monk and noted Theologian who died about 1250. Rare Editions of Thomas Aquinas and Thomas à Kempis the Author of the Imitation of Christ, one of the most widely printed Books in the World; some Splendid Saint Augustines from the First Press of Venice; The Famous Epistles of Saint Cyprian, Bishop of Carthage, Martyred about 258 A. D., published for the first time by Sweynheym and Pannartz, the First Printers of Rome; a Vellum-Printed Copy of Saint Jerome printed in 1470 by Peter Schoeffer Partner of Gutenberg's and many others of Equal Rarity and Value.

Fine First Editions of the most Famous Greek and Latin Classics are also numerously represented such as Aristotle, Euripides, Cicero, Plautus, Quintilian, Aristophanes Aulus Gellius, Boethius, Cornelius Nepos, Eutropius, Justinus, Juvenal, Lucian, Macrobius, Suetonius, Tacitus and many other famous Writers and Historians of Antiquity.

The Great Private Libraries of Europe which specialized in the Collection of Early Printed Books have been gradually sold and otherwise dispersed and the Acquisition of Books from the First Presses of Europe is daily becoming more and more restricted, and the Visible Sources of Supply will soon be closed altogether.

An Illustrated Catalogue of the Collection has been prepared and will be forwarded to Book Collectors on application, and the Books will remain on View until the end of February.

PREFACE

The Books offered in this Catalogue have been specially selected to Illustrate the History of the Origin and Development of the Art of Printing and include many of the most Notable Works produced by the Earliest Typographers of Germany, the Low Countries, Italy, France and England.

Amongst them are the "Cradle Books" of the First Presses of the Famous Free City of Mayence the Birth-Place of the New Art; Cologne, Nuremberg, Strassburg, Ulm, Basel, Munich and a few other German Cities.

Splendid Incunabula are here from the First Presses of Italy, the Country where the greatest and most permanent Improvements in the Art of Typography were perfected, and where in the last quarter of the Fifteenth Century there were more Cities where Printing was practised than in the whole of Germany and Holland combined, and almost twice as many as could be found in France. The Principal Cities represented are Rome, Milan, Bologna, Ferrara, Treviso, Florence, Verona, Parma, Vicenza, Friuli, and Venice, the Undisputed Centre of the Printing and Publishing Crafts of the World for nearly two Centuries.

The New Art was not Introduced into England until after 1472, and the Present Collection includes some very Remarkable English Rarities. For the First Time in the Bibliographical Annals of America Five Splendid Caxtons are here offered for sale at one time, together with a Magnificent Copy of the World Famous Book of St. Albans by Dame Juliana Berners, also one of the only 2 known Vellum printed Copies of Richard Pynson's "Nuptial Song" written on the occasion of the marriage of the Daughter of Henry VII of England, by Peter Carmelianus and a magnificent Copy of his grandly printed Black Letter Edition of the History of Troye by Dan John Lydgate.

Some Very Valuable and very Beautiful Works from the First Presses of Paris, Lyons, Louvain, Deventer, Haarlem, Bruges, and other Famous Cities of France and the Low Countries are also here described.

Amongst the Most celebrated Names of the World's First and Greatest Printers are those of Gutenberg the Inventor of the Art of Reproducing Books by movable metal types, Schoeffer his Partner, the ever mysterious "R" printer, Eggesteyn of Strassburg, Koburger of Nuremberg, Ulrich Zell, Heinrich Quentell, Michael Wenssler and Michael Furter of Basel, Zainer of Ulm, Conrad Sueynheym and Arnold Pannartz the First Roman Printers and Ulrich Hahn their Successor, John and Vindelin of Speyer the First Printers of Venice, Erhardt Ratdolt, Nicholas Jenson, Aldus the Founder of the Greatest of all Ancient Presses, Zarotto and Valdarfer of Milan, John of Westphalia, Kerver and Verard of Paris, the Schoolmaster Printer of St. Albans, William Caxton of Westminster and his assistant Richard Pynson.

1861988

From Holland we have the Famous Combination of Block Printing and Typography known as the "Speculum Humanae Salvationis" or in Dutch "Speghel onser Behoudenisse." This had its origin at Utrecht about the year 1471 but the name of the Printer is unknown. It was formerly attributed to Lawrence Janson Koster, and was supposed to have been printed by him at Haarlem about 1440, before Gutenberg printed at Mainz. There are still some Writers who hold to this Theory and who claim that the Speculum is the Earliest Specimen of Printing with movable types, thus anticipating the Gutenberg Bible by many years.

The Five or Six Books bearing a later date than that of the Year 1500 have been included here on account of their having been printed by the Assistants or Collaborators of the First Printers or on account of their exhibiting some new Development in the Typographical Art.

The total Value of this relatively small Collection amounts in all to about $150,000, but its Intrinsic Value lies in the unusually Choice State of the Works which compose it, the original Collectors of the Greater Portion of it having made this their Chief Desideratum nearly as long as two hundred years ago.

Attention must be paid to the fact that the Opportunity to acquire these Noble Monuments of the Early Printers is becoming of immensely greater difficulty every day. The Private Libraries of Europe who assiduously collected the Glories of the First Presses are practically all sold out, and there is absolutely no chance of their ever being dispersed by the Great National and Public Libraries which now contain the only Specimens of them extant.

An Illustration of the Old Morocco Bindings of most of the Books in the Collection is given on page 53.

Each Volume is preserved in a handsomely made morocco fireproof Case.

THE OLDEST MONUMENT OF XYLOGRAPHY AND TYPOGRAPHY EXTANT.

1. Speculum Humanae Salvationis. BLOCK BOOK. Dat Speghel Der Menscheliker Behoudenisse. Small folio, old red morocco gilt, ornamental frame and borders, gilt back. (Holland, Lourens Janszoon Coster, before 1470). $12,000.00

The Dutch translation of the Latin Speculum, and according to Schreiber the SECOND DUTCH EDITION. It contains 58 leaves, printed on one side of the paper, the blank sides pasted together (some have been partly separated); the first three leaves contain a preface, long lines, Gothic Letter, 31, 30, to a page, leaf 4 a table of chapters, 32 lines, while the remaining 54 leaves have each a diptych illustration within gothic columns and arches, with a Latin inscription; below in two columns is the explanatory Dutch text, the number of lines to a page varying from 24-27. The arrangement of leaves is the same as in the Latin edition, save in regard to the prefatory matter. All the illustrations are in the original uncoloured state. The interest of the present copy is enhanced by the fact that it was formerly in the possession of the celebrated geographer Abraham Ortelius (1527-98), and the following inscription in his hand appears on the recto (otherwise blank) of the first leaf. "Pr. ccxxiij De hoc

On the death of Ortelius the volume passed into the hands of his nephew Jacobus Colius Ortelianus who has written under his uncle's note "Den spiegel onser behoudenisse Jacobi Colii Orteliani, 1598."

No. 1. Speculum Humanae Salvationis.
Block Book. (1470.)

EXCESSIVELY RARE; Schreiber knew of only four copies, not one of which is complete. **The Typographical part of the Speculum may be set down as the earliest work of its kind done in Holland, probably between 1462 and 1465. The Xylographic portion may have been cut a year or two earlier.**

Laid in is a most interesting 5 page autograph description of the Book and its History written and signed by J. H. Hessels the well known Cambridge Bibliographer and Author of **"Gutenberg: Was he the Inventor of Printing?"** He says, "Of the Dutch Translation two Editions are known, both supposed to have been printed long before 1471, **by the same reputed Harlem Inventor of Printing, Laurens Janszoon Coster, who printed the two Latin Editions.** One Edition is usually called the **mixed Dutch Edition** because it has two leaves printed in a different type from the rest of the Book, the other is called the **unmixed Dutch** Edition because the whole text is commonly supposed to have been printed from one font of type. The present Copy though belonging, as far as its main part is concerned to the **unmixed** Edition, has this important peculiarity that the text of page 45 (with the Figurae 83, 84) is not printed in the same type as the rest of the Book, but in the newer type (Speculum Type 3) used for the other Dutch and the two Latin Editions." He then at considerable length gives the History of the Book whilst in the possession of Ortelius, his son and Nephew and the mention of it by Hadrian Junius in his **"Batavia"** which was written about 1568 and published in 1588 in which the **Invention of Printing** was credited to Coster of Haarlem. See Illustrations on pages 5 and 6.

Aurelij Augustini de ciuitate dei primus liber feliciter Incipit:

INTEREA CVM ROMA GOTTHORVM IRRVP tione agentium sub rege Alarico atq; impetu magne cladis euersa est: eius euersionem deorum falsorum mutorūq; cultores quos usitato nomine paganos uocamus: in christianā religionē referre conantes: solito acerbius & amarius deū uerū blasphemare cœperūt. Vnde ego exardescens zelo domus dei: aduersus eorū blasphemias uel errores: libros de ciuitate dei scribere istitui. Quod opus per aliquot annos me tenuit. eo q; alia multa intercurrebāt que differri nō oportēr&. & me prius ad soluendum occupabāt. Hoc autē de ciuitate dei grande opus tandem. xxii. libris est termiatū. quorū quinque primi eos refellunt qui res humanas ita prosperi uolunt ut ad hoc mutorum deorum cultum quos pagani colere consueuerūt: necessariū esse arbitrēr: et quia prohibētur: mala ista exoriri atq; abundare contendunt. Sequētes autem quiq; aduersus eos loquuntur: qui fatētur hec mala nec defuisse ūq; nec defutura mortalibus & ea nunc magna nunc parua: locis: tēporibus: personisq; uariari. Sed deorū mutorum cultum quo eis sacrificatur: propter uitam post mortem futuram esse utilem disputant. His ergo. x. libris duq; istq; uanę opiniones christianę religioni aduersanę refelluntur. Sed ne quisq; nos aliena tantum redarguisse non autem nostra asseruisse reprehenderē: id agit pars altera operis huius: que. xii. libris continetur. Quanq; ubi opus est: & in prioribus. x. que nostra sunt asseramus: & in. xii. posteriorib⁹ redarguamus aduersa. Duodecī ergo librorum sequentium primi quatuor continent exortum duarum ciuitatum quarum est una dei altera huius mundi. Secundi quatuor excursum earum seu procursum. Tertii uero qui & postremi: debitos fines. Ita omnes. xxii. libri cum sint de utraque ciuitate conscripti: titulum tamen a meliore acceperunt ut de ciuitate dei potius uocarentur. In quorum decimo libro non debuit pro miraculo poni: in Abrae sacrificio flammam celitus factam inter diuisas uictimas cucurrisse: quoniam hoc illi in uisione monstratum est. In xii. libro quod dictum est de Samuele non erat de filiis Aaron: dicendum potius fuit: non erat filius sacerdotis. Filios quippe sacerdotum defunctis sacerdotibus succedere magis legitimi moris fuit. Nam in filiis Aarō repit pater Samuelis: sed sacerdos non fuit: nec ita ī filiis ut eū ipse genuerit Aarō: sed sicut omnes illius populi dicuntur filii israel. Deaduersarijs nominis xpi quibus inuectiones urbis propter christum barbari pepercerunt uictis Capitulum primum.

GLORIOSISSIMAM CIVITATEM DEI siue in hoc tempor⁹ cursu cū inter impios peregrinatur ex fide uiuens: siue ī illa stabilitate sedis eterne quā nunc expectat per patientiam: quoadusq; iustitia conuertat in iudiciū: deinceps adeptura per excellētiam victoria ultima et pace perfecta: hoc opere ad te instituto et mea promissione debito: defendere aduersus eos q̄ condītori eius deos suos preferūt fili carissime Marcelline suscepi: magnum opus et arduum: sed deus adiutor noster. Nam scio quibus uiribus opus sit: ut persuadeatur superbis: quā sit uirtus humilitatis: qua fit ut oīa terrena cacūina temporali mobilitate nutantia: non humano usurpata fastu: sed diuina gratia donata celsitudo transcendat. Aulus Gellius a Latin Grammarian of the Second Century composed his "Attic Nights" for the Amusement of his Children. It appears from his own account that he had been accustomed to keeping a Diary in which he recorded whatever he heard in conversation, or met with in his reading that he considered worth remembering. The Work contains Anecdotes and Arguments, Scraps of History and Pieces of Poetry and dissertations on various points in Philosophy, and it consequently gives much valuable information on subjects relating to Antiquity of which we should have been otherwise ignorant. See Illustrations on pages 15 and 93.

Editio Princeps. THE SECOND BOOK PRINTED BY GUTENBERG AND THE FOURTH BOOK PRINTED WITH A DATE.

Its extraordinary rarity and value are conceded by all Bibliographers. Its importance is greatly due to the fact that it is the FIRST LEXICON OR DICTIONARY EVER PUBLISHED. The magnificent Binding is a most uncommon example of Old English gold tooling. These volumes were formerly in the MacCarthy library, but the copy does not appear in the sale catalogue, as it had been previously exchanged for one printed on vellum. A Remarkably Fine Copy of this Fine Early Production of Gutenburg's Mentz Press, **ruled throughout in red and rubricated, with numerous initials and capitals painted in blue and red.** From the MacCarthy library it passed into the possession of the DUKE OF CASSANO, whose library was bought by Earl Spencer in 1820. It then occurred in the latter's sale of duplicates in 1821. It again appears in Dr. Kloss's library sold in 1835, and at Christie's in 1847. There is a rubric at the end of vol. II: **"1473, 14 Febrarii."**

The Language of the Colophon so far as it relates to **the New Art,** and the Glory of the City of Mentz, is strikingly more emphatic, more original, and more stamped with the tokens of Priority than any of similar statements made in Schoeffer's Colophons. It reads, **"Altissimi presidio cuius nutu infantium lingue fiunt diserte. Qui q nuo sepe puulis reuelat quod sapientibus celat. Hic liber egregius, catholicon. dnice incarnacionis annis Mcccclx Alma in urbe maguntina nacionis inclite germanice. THE "R" PRINTER'S VERY RARE "CATHOLICON."

25. BALBUS DE JANUA, JOANNES. Catholicon, Commences "Incipit summa que vocatur Catholicon edita a Fratre Johanne de Janua ordinis Fratrum Predicatorum." **Printed in Gothic Letter, double columns, 67 lines to the column, without marks, several very fine large painted Capital Letters in carmine and blue, and with hundreds of initials painted in red.** Folio, blue morocco extra, marbled edges gilt. Without Place, Printer's name or date (Strassburg the "R" Printer about 1466) $900.00

The Extremely Rare Edition from the press of the Printer who used the peculiarly formed capital "R" so well known to students of Fifteenth Century Typography. By Hain and other Bibliographers, books containing this peculiar letter were attributed to the press of Mentelin, but it is now generally allowed that it cannot with any certainty be said who was the printer of them. See Illustration opposite.

26. BARTHOLOMOEUS DE CHAIMIS. Confessionale Bartholomei. **Gothic letter, double columns, 35 lines to the page, with signatures.** 4to, full green crushed levant; fine blind tooled borders on sides, gilt edges by RIVIERE. n. p. n. d. about 1485 $60.00

The first page bears only the two words Confessionale Bartholomei. A very rare and Early Edition of this Famous Manual of Confession. According to Hain it was presumably printed by Speyer of Strassburg about 1485. Fine Copy with marginal notes in a very old hand.

FROM THE FIRST PRINTING PRESS OF ROME. 1469.

27. BESSARION, JOANNES.. Adversus Calumniatorem Platonis libri V, et liber de Natura et Arte adversus Georgium Trapezuntium. **Roman letter and Greek Types for quotations, long lines 38 to the page, without marks, two large Initial letters of a very unusual style of Ornament composed of interlaced decorative scrolls entwining the plain letter, painted in brown, and with other large Capitals painted in red.** Folio, old calf gilt, Rome, Conrad Sweynheym and Arnold Pannartz. (1469). $800.00

First Edition of a Rare and Famous Book written by John Bessarion the Patriarch of Constantinople who died in 1472. Sweynheym and Pannartz established the first Italian Printing Press in the Monastery at Subbiaco in 1465 which they left in 1467, for the purpose of setting up their press in the Palace of Prince Massimi at Rome. The Colophon containing the Printers' names and those of their Patrons the Massimi, is in the form of an eight-line Latin Verse. The date of the Book is certified by two Epistles thanking Cardinal Bessarion for the Book each dated 1469. On the blank leaf at the beginning is a contemporary inscription to the effect that the Book had been bequeathed to the Carthusian Monastery by Senor Nicolas de Coimbra in 1480.

THE GREAT NUREMBERG PRINTER'S SECOND BIBLE of which he issued no less than 13 Editions in 26 years, a feat equalled by no other of the First Printers. **From George Livermore's Famous Bible Collection with the Bookplate of the Harvard College Loan Exhibition dated 1859. IN SPLENDID PRESERVATION.**

Dr. Pettigrew, the Duke of Sussex's Librarian, in comparing the First and Second Koburger Bible says "**The Arrangement of this Bible and its Reading corresponds precisely with the First Edition; but the epistle of the Monk Mesnard, and the Canons of Eusebius have been added. The type of the Bible is of a more elegant character than in the Edition of 1475.**"

30. BIBLIA SACRA LATINA, editionis vulgatae, cum prologis S. Hieronymi et Interpretationibus Nominum Hebraicorum. **Printed in small Gothic Characters, double columns, with signatures but no numeration, large Ornamental Initial on first page, painted in blue, with elaborate pen ornamentation in red, blue and green, with hundreds of smaller Capitals painted in blue.** Folio, old English red morocco richly gilt, gilt edges. RARE VENETIAN BIBLE, 1483.

31. BIBLIA SACRA LATINA editionis Vulgatae, cum prologis S. of the top of the page. Although pagination of the leaves had been introduced but a few years before, it had not at this date become a general practice, especially among the minor printers.

FROM THE SECOND PRESS OF VENICE. 1472-3.

33. BOCCACCIO, GIOVANNI. Genealogia Deorum Gentilium. **Roman letter, long lines, 41 to the page without marks.** Also bound in same volume is Boccaccio's DE MONTIBUS: SYLVIS: FONTIBUS: LACUBUS. Printed in the same types as the "GENEALOGIA." 2 vols in one, old red morocco gilt, gold borders on sides, gilt edges. Venice. Wendelin of Speier 1472-1473. $225.00

EDITIO PRINCEPS OF EACH WORK. Before the Colophon of the Genealogia are a number of verses the last two lines of which read

Hec Vindelinus signis qui impressit ahenis
Se tibi comendat familiamque suam.

No printer's name appears in the **"De Montibus"** but it is usually found at the end of the Genealogia and the type is undoubtedly Vindelin's. John of Speier founded the first Press at Venice in 1649 and his brother Vindelin succeeded him in 1470. Very fine Copies of both Works.

AN EXCEEDINGLY RARE KOBERGER, 1473.

34. BOETHIUS, ANICIUS. De Consolatione Philosophiae cum Commentario S. Thomae de Aquino, latine et germanice. **Gothic Letter, text and translation in long lines 23 and 46-7 to a page, without marks,** rubricated throughout, large Ornamental Initials painted in red and blue alternately. Folio, old red morocco gilt, wide dentelle borders, gilt edges. Nuremberg. Antonius Koberger. 1473. $350.00

An extremely rare Edition of which no Copy ever seems to have been sold by Auction, although Koberger's reissue 1476 is frequently quoted. Chaucer's Translation printed by Caxton appeared in 1478.

Anicius Manlius Torquatus Severinus Boethius, Roman Consul, Philosopher, Mathematician and Author was born in Rome about A. D. 470. In Athens he studied Philosophy under Proclus and others. On his return to Rome he became a Favorite of Theodoric, King of the Ostrogoths, then Master of Italy and was long the Oracle of his Sovereign and the Idol of the People. In 526 he was accused of Treason and Executed. His Principle work "ON THE CONSOLATION AFFORDED BY PHILOSOPHY" is written in Prose and Verse intermixed. The elevation of thought, the nobleness of feeling, the ease and distinctness of style which it exhibits makes this composition short as it is, far superior to any of the age. It has been translated many times into every European Language.

No. 35. Book of Saint Albans. 1486.

Popular Rhymes. Its authorship is attributed to Dame Julianna Barnes or Berners Prioress of Sopwell near St. Albans. This error arose from an inscription found at the end of the second part, the metrical treatise on Huntyng, addressed by a School Dame to the Children or "Bairns." The printer of the Work is known, from an allusion to him by Wynkyn de Worde, to have been a School-Master at St. Albans, whose name however has remained unknown. **Only two complete Copies of the First Edition of this Celebrated work are known.** Dibdin in his Bibliomania mentions that this Copy was given to the Earl of Pembroke by John Anstis, the famous Herald, Garter King of Arms. See Illustrations on pages 26 and 27.

Breviarium—*Continued.*

JENSON'S PRESS AND ONE OF TEN COPIES PRINTED ON VELLUM. In its Unique and Artistic Coloring and Illumination, it equals the Best of the Illuminated Manuscript Hours of the same Period, and the Printer was evidently deceived by this Resemblance when he lettered the Book on the Back "MANUSCRI." The Borders and Figures and other painted ornaments are extremely elegant and include some work in fine Camaieu-rouge. Among the Animal Figures is a large and singular looking Elephant painted in black, a Bear walking off with a Man armed with a Spear, over his Shoulder, Horses with heads of Monks, Apes and Griffins. There are also numerous Manuscript Additions evidently made for the Cardinal Owner of the Book, to supply certain Offices not included in the Printed Version.

BREYDENBACH'S PILGRIMAGE TO THE HOLY LAND.

39. BREYDENBACH, BERNHARD. Opusculum Sanctarum Peregrinationum in montem Syon ad venerandum Christi sepulchrum in Jerusalem, atque in montem Synai ad divam virginem et martirem Katherinam. Gothic character, long lines without numeration signatures and catchwords, 7 large folding woodcut views of Venice, Parenzo, Corfu, Modon, Crete, Rhodes and the Holy Land. Woodcut frontispiece containing in the richly ornamented border the Coats-of-arms of Bernhard Breydenbach, John Count of Solony, and the Knight Philip of Bicken; also numerous other woodcut illustrations. Folio, full blue morocco extra, gilt edges. Mentz: Erhard Reuwich, 1486. $1500.00

FIRST EDITION. A superlatively Rare Work when found with all the plates intact; as they have in the past been much sought for by Print-Collectors and numerous Copies have been mutilated on that account. They are also of such great length that hundreds of the Views must have been destroyed by careless handling. The Grand View of Venice is about 70 inches long and the very interesting Map of the Holy Land is quite 50 inches long. On the back of this are depicted some of the most Extraordinary Animals which the Author met with on his Journey including Crocodiles, Salamanders, Unicorns and a very human looking Ape.

NOT THE LEAST INTERESTING POINT ABOUT THE VOLUME IS THAT THE VERY BEAUTIFUL AND INTRICATE FRONTISPIECE IS THE WORK OF ALBRECHT DURER AND MANY OF THE OTHER ILLUSTRATIONS BEAR TRACES OF HIS EARLY STYLE. See Illustrations on opposite page and on page 92.

Very fine Copy of this esteemed Edition edited by Hieronymus Bononius of Treviso. Books with this Printer's Imprint are extremely scarce.

41. CAMPANUS JOANNES ANTONIUS. Opera, scilicet: Tractatus V. Orationes XV. Epistolarum libri IX. vita Pii. Historia, Brachii. Epigrammatum libri VIII. **Printed in Roman letter, 56 long lines to the page, with signatures, but no numeration, fine large Woodcut of a Bell on first page, numerous ornamental woodcut initials and a very fine full page Architectural Woodcut with Figures at end.** Folio, old sprinkled calf gilt. Rome. Eucharius Silber. 1495. $200.00

FIRST EDITION. Campanus rose from a shepherd boy to be the confidant of two Popes--Paul II and Sixtus IV. The most interesting part of the volume is probably the history of the deeds of Andrea Braccio of Mentone, of the Bracchi family, and of the struggles against Sforza and the Lords of Rimini, forming a valuable contribution to the history of Italy under the Despots. At the end occurs the famous epigram of Michael Fernow against the Roman booksellers.

FIRST EDITION OF A MEDIAEVAL ENCYCLOPEDIA

42. CAPELLA, MARTIAN. Opus de Nuptiis Philologie et Mercurii libri duo; de grammatica; de dialectica; de arithmetica; de rhetorica; de geometria; de astronomia; de musica libri septem. **Printed in Roman letter, with the title in large Gothic Characters, long lines, 37 to a page, with signatures, but without catchwords, or numeration. Fine printers device on last page.** Folio, fine old English Morocco, gilt edges, in fine levant Solander case. Vicenza. Henricus de Sancto Urso. 1499. $200.00

First Edition. The Essay on Music is particularly interesting. The Poet Capella was born at Carthage, Africa, and lived in Rome about 475. The Work is a medley of Prose and Verse and is a kind of Encyclopedia of the Arts and Sciences as known for about a thousand years and it was highly esteemed in the Middle Ages as a Text Book. The Section on the Greek Theory of Arithmetic treats of the various classes of Numbers such as plane and solid, and mentions the supposed Mysteries of the smaller numbers, the monad suggesting one God, the dyad Good and Evil, the triad the Trinity and so on. A passage in the Section on Astronomy is said to have suggested the System of Copernicus.

the Embassy sent by the Emperor Maximilian to England to negotiate a Marriage between the Emperor's grandson afterwards the Emperor Charles V and Mary daughter of Henry VII. The Author Peter Carmelianus was the English Court Poet, he wrote first in laudation and then in vituperation of Richard III, and was appointed Chaplain and Latin Secretary to Henry VII. He is further described as being Lute Player to Henry VIII.

Books printed by Richard Pynson will always be of Peculiar Interest to the Collector of Books from the Early English Presses. Pynson a Norman by birth was a Student of the University of Paris and learned the Art of Printing at Rouen, with Guillaume le Tailleur. He went to England about 1488, and became the Assistant of CAXTON and fellow-worker of WYNKYN DE WORDE. On the accession of Henry VIII he was appointed King's Typographer, became England's Greatest Law Printer and introduced Roman Type into that country in 1509. See Illustration on page 33.

44. **CARACCIOLO DE LITIO, ROBERTO.** Sermones Quadragesimales Italice. **Roman Letter, long lines, 38 to the page with signatures but no numeration.** Folio, old sprinkled calf, full gilt back. Florence. Nicholaus Laurentius. 1480. $100.00

A very uncommon Edition of Caracciolo's famous writings, from the Second Printer's Press at Florence. Quite unknown to Proctor.

Robertus Caracciolus was one of the Order of Minor Friars, and died about 20 years after the publication of this book. He was Bishop of Aquino in 1471, noted for his great eloquence, and for the humor (or, rather, what would today be characterized as burlesque) in which he attacked the laxity of morals and extravagance of living of the higher prelates. Many editions were printed of his sermons

No place or date but Venice Johan de Colonia and Johan Manthen. 1475. $500.00

THE SECOND EDITION OF THE COLLECTED WORKS OF THESE FOUR POETS AND OF GREAT RARITY. It Commences on the verso of leaf I with a brief summary of the Life of Catullus occupying 11 lines only. The Poems of Catullus then begin on the recto of the next leaf and occupy 34 leaves. Then follows a Life of Tibullus followed by his poems occupying 32 leaves. Next is the Life of Propertius followed by his poems which occupy the ensuing 59 leaves, with the Imprint of John of Cologne and John of Manthen at end. Statius follows and occupies the next 60 leaves. **The few Copies which occur for sale hardly ever contain the Lives of the three Poets and the three blank leaves.** A former owner has erased many of the very numerous passages in Catullus which offend by their grossness and impurity but the ink in course of time has faded away leaving the original printed text intact.

FIRST EDITION OF CAXTON'S FIRST ENGLISH TRANSLATION AND PRINTING OF ANY OF CICERO'S TREATISES. OF IMMENSE RARITY AND ONE OF THE MOST PRECIOUS EXAMPLES OF CAXTON'S PRINTING PRESS IN ENGLAND. Caxton says that Cicero's "De Senectute" and "De Amicitia" were translated into French by the command of Louis, Duke of Bourbon, in 1405 by Laurence de Premierfait, a celebrated Translator The French Version of "The Declamation of Noblesse," originally written in Latin by Bonaccursus de Montemagno, was made by John Mielot, and was one of the first books printed by Colard Mansion at Bruges. The English Translation of De Senectute has been ascribed by Leland to the Earl of Worcester and to Wyllym of Wyrcestre, but was probably made by **Stephen Scrope, the son-in-law of Sir John Fastolfe.** The Translator has taken Premierfait's French Version for his text and has produced a very literal translation. The English Version of "De Amicitia" and "The Declamation" Caxton Attributes to the Earl of Worcester, who later on, translated Caesar's Commentaries. **Twenty Copies of the Book are known of which eight are imperfect.** Preserved in one of Riviere's finest Solander Cases.

Interest, being the Earliest Printed Work in which continuous Geometrical Figures occur in any Quantity and printed with such Care and Ingenuity. **Many of the Figures are composed from lines and rules, but a very large number are delicate wood engravings.** The Enormous Labour attending such a task is dwelt upon at length by Ratdolt in his Scholarly Dedication to the Doge John Mocenico, professing his wonder that amid the great quantity of Old and New Books that were daily being published in the Doge's **"fortunate and prepotent City"** so little had been done for the Study of Mathematics, but supposes that it arose from the difficulty of printing the necessary Diagrams with the Text.

A Singularly Interesting Monument of Religious History, issued during the Pontificate of the Monstrous RODERIC BORGIA, known as Alexander the Sixth, who shortly afterwards was poisoned at a Feast by drinking of a Bowl he had prepared for one of his Guests. Indulgences, the papal system for the Absolute Pardon of Sin were commenced by Leo III about the year 800. In the twelfth Century they were granted as Rewards to the Crusaders. In 1313 Clement V was the first Pope to make them a matter of public sale. In the early part of the 16th Century Leo X published general Indulgences throughout Europe and the Resistance to them led to the Reformation. **By the terms of this Miraculous Document the purchaser could choose his own Confessor, to whom was given the power, after hearing the Confession, to absolve him from all Sin, however enormous, and grant him full remission during Life and again at Death. The Form of the Absolution which follows after the Confession was clearly intended to be pronounced by the pardoner so that the purchaser of the Indulgence could be absolved from the most serious Crimes within a few minutes after its price had been paid.**

RARE EARLY MEDICAL WORK WITH FINE WOODCUTS. 1500.

Impressum Venetiis per Joannem et Gregoriu de Gregoriis fratres. 1500. $450.00

The First leaf bears on the recto a large woodcut of a master instructing his students, above whom is inscribed: "Petrus de Montagnana,"and the verso is occupied by a fine woodcut representing a consultation of doctors. The other woodcuts which are the full size of the page give figures of men and women, Doctors, the Death bed of a Plague Patient, a dissection scene with ten figures. The woodcuts, which are the grandest works of the kind produced in Venice except the "HYPNEROTOMACHIA" are said by some bibliographers to have been designed by ANDREA MANTEGNA. Dr. Lippmann however says, **"The design is undoubtedly by an artist nearly related to GENTILE BELLINI. The figures are from twelve to fifteen centimetres in height, and---especially the heads-----drawn with much skill. There is a statuesque ease in the arrangement of the compositions, which gives them an appearance of relief, and harmonises admirably with the simple and firm outline-drawing. The scenes which exhibit the dying plague-patient, and the consultation of doctors, have a touch of that solemn gravity which Venetian art knew so well how to infuse into the pictorial representation of important incidents."** See Illustration on page 60.

the Northern portion of Africa, showing the River Nile, with its sources in two lakes, one directly on the Equator, and the other just south of it. These lakes correspond in places with those now called the Albert and Victoria Nyanza, showing that their location was surmised, if not actually known to Geographers four Centuries before their late Rediscovery. At the South streams rising in mountains flow into these Lakes. The Niger in Western Africa is also laid down. This Map is a very early example of true Chiaroscuro printing. Of Pomponius Mela nothing whatever is known, but he is believed to have lived in the time of the Emperor Claudius. This is one of the earliest of all Geographical Works, the First Edition of which, **without any Map,** appeared in 1471. It is written in a simple and clear style and notwithstanding its conciseness is enlivened with interesting descriptions of Manners and Customs.
